Survey

Dr. Kevork Peltikian (from Atlantic Multi-Organ Transplantation Program in Halifax) and I would like to invite you, as a family physician in Nova Scotia to participate in this online survey. The purpose of this short 5-7 minute online survey is to examine the comfort level of family

physicians in Nova Scotia in providing long-term post transplant care for their patients. The number of transplanted patients are increasing in the region. The information collected may help us assess this service from a primary care point of view rather than from a transplant centre point of view.
